

Addressing Key Facility Needs in ED-CO Schools

BACKGROUND

- Ed-Co has a strong community feel with fantastic teachers and coaches who care about the kids. Many of our alumni are coming back home to raise their own children here.
- The School Board brought together Facilities Committees made up of staff and community members.
- Our top priority is to continue to provide a safe learning environment and a top-quality educational experience to engage, inspire and empower our students.

WHAT ARE OUR FACILITY NEEDS?

The heating, ventilation and air conditioning (HVAC) systems in our elementary school building have been problematic for many years. At times, students are dismissed early due to extreme heat in the building.

We must update our career and technical education spaces to provide greater opportunities for our students to learn skilled trades.

We look to build a new competition gym for athletic events, physical education and community use.

We must continually monitor & upgrade our security mechanisms to ensure we keep our students and staff safe. This includes making improvements to the current traffic flow and drop-off/pick-up at our Jr./Sr. High.

WHY MOVE FORWARD NOW?

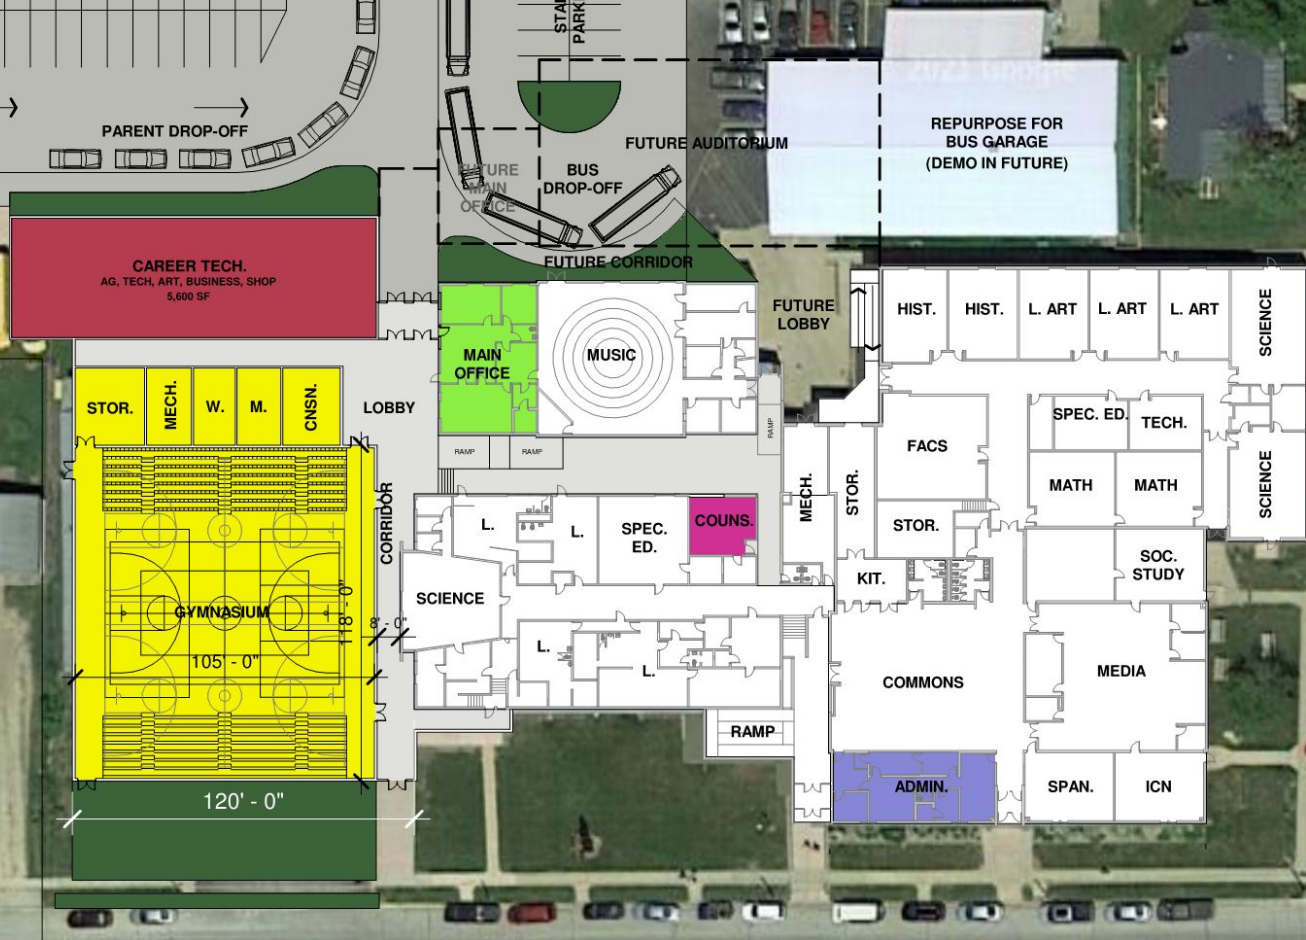

- Interest rates are currently at historic lows. Moving forward now would enable the district to make the most of the opportunity to address its facility needs.
- Construction costs continue to increase every year. The longer we wait to address our facility needs, the more expensive it will be to do so.
- We aim to develop facilities and programs that encourage our graduates and teachers to stay, with more diverse projects and opportunities that emulate what we love about ED-CO.

**A POTENTIAL SOLUTION FOR THE
COMMUNITY'S CONSIDERATION**
